

# An open, smart device for piglet mass treatment?

## An **EASI** choice.

Easi allows full traceability of :

- Animal & farm facilities
- Injection process
- Compatible with any medical product on the market

**EASI**   
Easy Swine Injector

*The first mass treatment device, open for any product, with full traceability. An EASI Choice!*

# Why is it an *EASI* choice?

## ➤ *Because EASI is an OPEN device*

**EASI is a Smart needle device** compatible with all the different products in the market

## ➤ *Because EASI is designed for MASS treatment*

as EASI is open, it can be used for all mass treatments at weaning and farrowing...

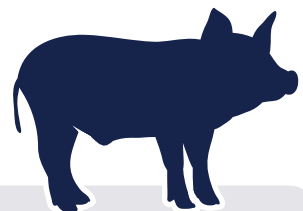

- **Heavy duty design** for long vaccination sessions
- **Adaptable** to fix in trolleys and farm walls too

farrowing

weaning

nursery

*More than a device*

**A FULL SOLUTION**

*to improve performance*

## EASI provides FULL TRACEABILITY

From essential treatment control until high analysis. EASI device plus Ceva software: Farm Manager, Injector manager and PHP allows you to manage:

### > Piglet

EASI allows you to **identify piglets** by RFID crotal identification.

### > Product

EASI and the system allows you to **register the product**, batch and vials used.

### > Place

EASI can register information about buildings and facilities: farms, rooms and crate tracking.

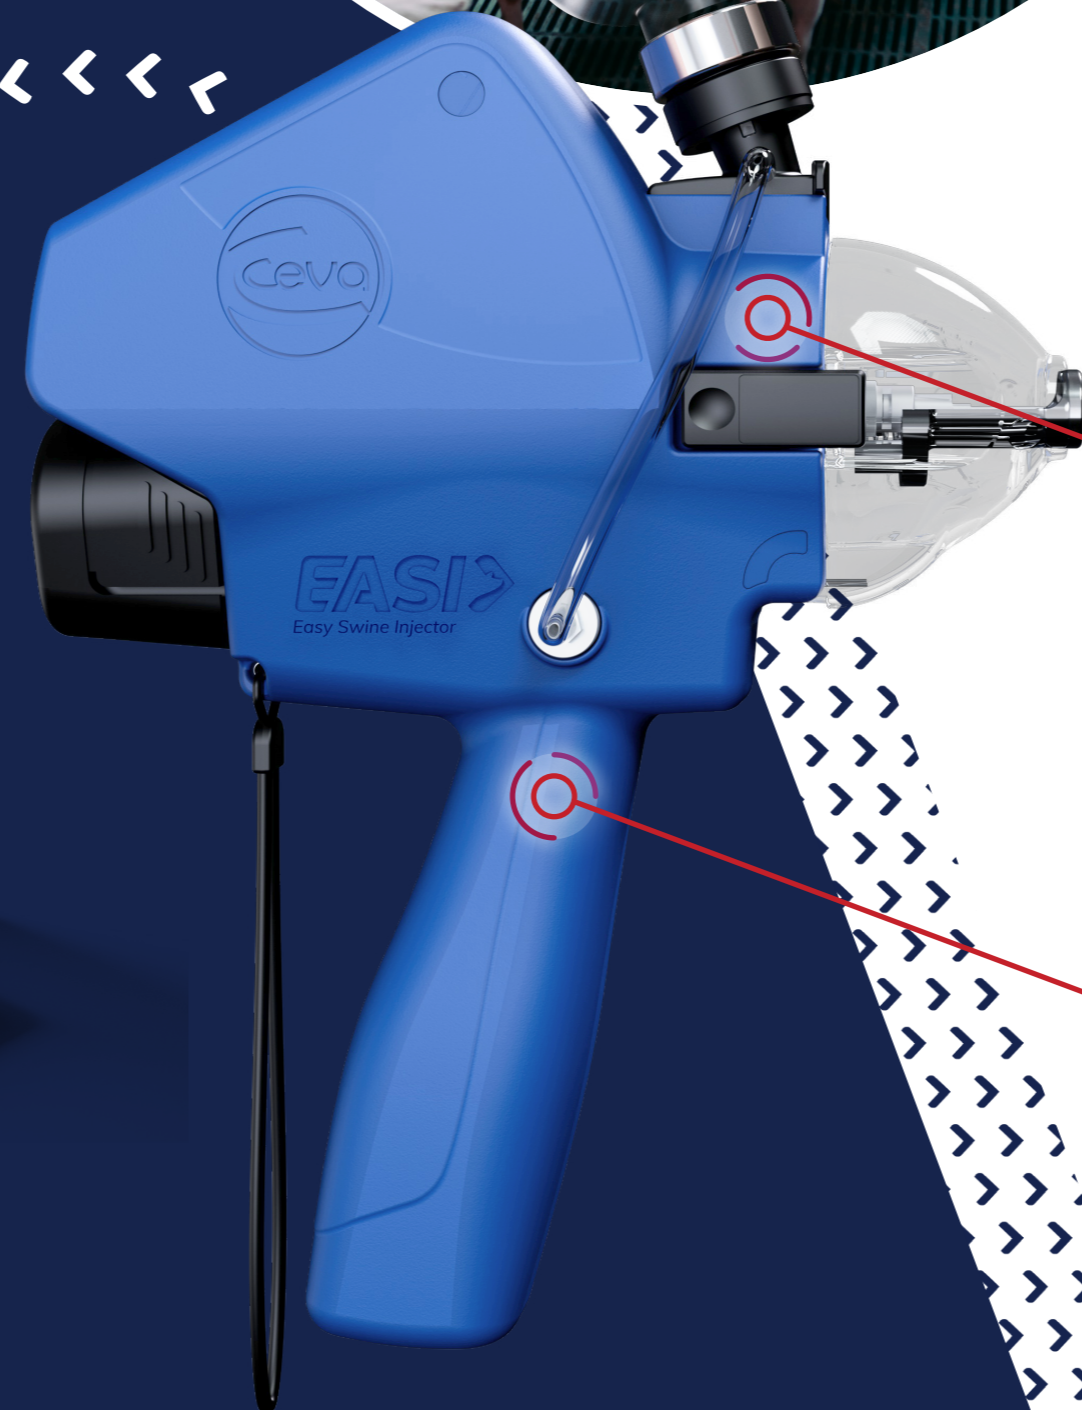

### > Process

EASI manages data treatment:

- Day, hour, product, dose, volume
- Treatment quality data
- Treatment calendar management

More than a device  
**A FULL SOLUTION**  
to improve performance

## Mass treatment

- **Well balanced** and lightweight
- **Minimum manual actions**  
- Automatic processes
- **Automatic dose** for CEVA products
- **Adjustable dose** for none CEVA products.
- **Designed for human safety**
- **No accessible needle**

## Vaccination quality

- Able to **homogenize treatments processes**
- **Alerts and sensors** focused on correct vaccination
- **Aims to avoid** human error

## Animal welfare

- Ensuring the animal in correct position **for each injection**
